## DataSprint

The scalable data solution for your business

Built on proven technologies from IBM like Aspera and FASP (Fast and Secure Protocol), **DataSprint** can reliably transfer terabytes of data across the world at ultra high speed – using your existing internet connection. The **DataSprint** service includes enterprise-grade transfer functionality and expert support and advice – in one low, fixed-cost package.

### Two DataSprint editions

**DataSprint Pro** and **DataSprint Elite** are both cloud-agnostic, highly secure, file transfer solutions. Unlimited high speed transfer node expansion, adaptive rate control, congestion avoidance, folder sharing and desktop sync are just some of the features included as standard. Both editions of DataSprint feature a minimum of 1TB included cloud burst transfer data and cloud storage per month to get you started. We also offer '+' versions of these editions that feature additional functionality.

#### All DataSprint Editions Include:

- Hosted web interface
- Unlimited data transfer
- DataSprint Managed
- Burst into cloud
- Transfer Server deployed on-prem or in the cloud
- 24/7 Technical Support, updates & Advice, Extensive APIs
- Encryption-at-rest with optional bring-your-own-key
- Adaptive rate control and congestion avoidance
- High security encryption
- Folder sharing
- Local storage connection
- Cloud provider agnostic
- Previews of stills, video and Office documents
- Basic activity and events monitoring
- Unlimited high speed transfer node expansion
- Desktop sync and auto-download
